17 Engine oil consumption too high, 2.0L TFSI (EA888) Model Year 2009 - 2011

17 13 43 2027731/5 October 16, 2013. Supersedes Technical Service Bulletin Group 17 number 13-42 dated October 10, 2013 for reasons listed below.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
A4	2009 - 2011	All	2.0L TFSI
A5	2010 - 2011		
A5 Cab	2010 - 2011		
Q5	2011

Based on customer complaint, follow the procedure below.

Technical Background

In order to provide effective lubrication and cooling of internal engine components, all internal combustion engines consume a certain amount of engine oil. Oil consumption varies from engine to engine and may change significantly over the life of the engine. Typically, engines with specified break-in periods consume more oil during the break-in period, and the oil consumption will stabilize after the break-in period. Refer to the *Owner's Manual* for specific break-in procedures.

Under normal conditions, the rate of oil consumption depends on the quality and viscosity of the oil, the RPM at which the engine is operated, the ambient temperature and road conditions. Additional factors are the amount of oil dilution from water condensation or fuel residue and the oxidation level of the oil.

Under certain driving conditions, internal engine pressure conditions in the 2.0 TFSI engine can negatively influence the rate of oil consumption. This condition can occur while the vehicle is operated in metro driving conditions; for example: stop-and-go traffic with extended idle periods.

Production Solution

Crankcase pressure reduction starting with model year 2012.

Service

1. Upon *customer complaint* of excessive engine oil consumption, proceed as follows:

- Replace crankcase pressure regulating valve with part number **06H103495J**.
- Replace front crankshaft seal with part number **06L103085B**. (Also requires front crankshaft bolt **WHT001760**).
- Update the Engine Control Module software using SVM action code listed in the table below.
- Follow all instructions TSB 2011732: *00 Software Version Management (SVM), operating instructions*.

Technical Service Bulletin

2. Start oil consumption measurement, Part 1.

Tip: Ensure the VAS device is at software level (*Base 19 and Brand 19.34*) or higher

Tip: The electronic oil consumption measurement will only function on the 2.0 TFSI engine with engine code **CAEB**.

- **Park vehicle on a level surface, the GFF test plan will *not* continue if vehicle is tilt more than 0.5 degrees (*side to side or front to rear*).**
- From GFF, select *Function/Component Selection>>>Powertrain>>>CAEB –Engine>>>01-Oil consumption measurement (electronic measurement)*.

Figure 1. 01 – Oil consumption measurement (electronic measurement).

- Follow the GFF test plan, *Start oil consumption measurement* exactly and observe all notes and cautions.

Warranty

Only one oil consumption test will be reimbursed under Warranty within the next 25,000 miles (40,000 km).

Note:

Oil measurement plan must be performed independently. Time for additional tasks performed via GFF should not be included in oil measurement time and is subject to removal.

Claim Type:	Use applicable claim type. If vehicle is outside any warranty, this Technical Service Bulletin is informational only.		
Service Number:	1055
